Business Intelligence Supervisor with 3+ years in FMCG sector. Builds dashboards, analysis and data pipelines. Works with SQL (PostgreSQL), Python, Tableau.

EXPERIENCE

Business Intelligence Supervisor, Tempo Scan Pacific (Jakarta) - June 2026 – Present

- Developed an hourly refreshed RFM (Recency, Frequency, Monetary) dashboard in Tableau, providing near-real-time customer segmentation insights to support marketing program planning and targeting.
- Migrated 5-10 recurring Excel reports to Tableau with direct SAP/Data Lake connections, enabling faster data access and self-service data extraction while reducing ad-hoc requests.
- Coordinated a 1-person BI analyst team, collaborating on dashboard development, reviewing SQL and Tableau outputs, and supporting monthly reporting deliverables.
- Created a star schema in PostgreSQL and combined it with SAP BW data using Tableau Prep, delivering integrated datasets for Tableau dashboards on Tableau Server.

Data Management & Analyst, Tempo Scan Pacific (Jakarta) - January 2023 – May 2026

- Delivered Executive Summary dashboards in Tableau for Marketing, Trade, and Finance; tracked budget vs. actual with drilldowns by SKU, Channel, and Branch across 1500 active SKUs.
- Supported annual marketing budgeting end-to-end: built SKU-level sales forecasts in Excel, allocated branch budgets, and consolidated final files for management review.
- Developed a program monitoring dashboard in Tableau for Marketing to track ongoing trade programs, and applied moving-average forecasting to estimate program participation.

Staff Intern, *Bank Rakyat Indonesia* - March 2022 – September 2022

- Managed credit card data entry and monthly recapitulation reports using Excel. Processed QRIS merchant approval workflows for digital payment onboarding.
